technology.

TECHNICAL SPECIFICATIONS

Weight, Main Unit Only	1.9 kg (4.1 lbs)
Dimensions.....	31 cm x 23 cm x 7.3 cm (12.2 x 9.1 x 2.9 in)
Doppler Technology	Continuous Wave (CW) unfocused 2.0 MHz probe
.....	Continuous Wave (CW) unfocused 1.8 MHz probe
Battery Type.....	7.2V NiMH, 6x4/5A, rechargeable
Full Charge Life	3 hours
Battery Recharge Time.....	3 hours
Operating Ambient Temperature.....	10° C - 40° C (50° F - 104° F)
Graphic Display	320 x 240 pixel color or b/w
Printer.....	Thermal, 104 mm print width, 832 dots, 8 dots/mm
Printer Paper.....	Roll, 112 mm wide, thermal
Print Speed	1 cm/minute, 2 cm/minute and 3 cm/minute
Speakers.....	(2) 66 mm, 8Ω, 0.5 watt
Audio Output	0.5 watt per channel
Recharger, INPUT	100 - 250 VAC, 50/60 Hz, Model WSL170M
Recharger, OUTPUT.....	7vDC @ 3.5 A Model WSL170M
Safety Standards.....	IEC 601-1, EN60601-1, EN60601-1-2, IEC 60601-2-37
Classification	Internally powered equipment
Classification of Protection Against Electrical Shock.....	Type B

CATALOG NUMBERS

Complete VersaLab APM System with 2.0 MHz Probe*	Catalog #MVAPM
For single fetus heart rate monitoring	
Complete VersaLab APM2 System with 2.0 MHz & 1.8 MHz Probes*	Catalog #MVAPT
For single and twin heart rate monitoring	

*Both systems include Toco probe, event marker, tilt stand, transducer belts, printer paper, power supply and cord

Nicolet VersaLab[®] APM and APM2 ANTEPARTUM MONITOR SYSTEMS

VIASYS[™]
HEALTHCARE
Excellence For Life

Nicolet VersaLab® APM and APM2

“Nicolet VersaLab Antepartum Monitors from VIASYS Healthcare are the perfect addition to my clinical practice. These systems are taking my practice to new places.”

THE PERFECT PORTABLE SOLUTION

The Nicolet VersaLab APM is a portable, economical antepartum monitor (APM) for performing non-stress tests. It is the smallest and lightest APM available that features a built-in printer. The Versalab APM2 system allows you to perform non-stress testing on one or two fetuses simultaneously. Both systems provide the ultimate in portability and convenience. You choose the one that best meets your needs.

TRULY PORTABLE

The VersaLab APM and APM2 are the only compact antepartum monitors with a built-in printer. Each system weighs less than 2 kg (4.1 pounds) and can be battery or line operated for portability and convenience. It can be easily moved between exam rooms, satellite clinics, or taken to remote settings, which makes it ideal for clinicians who do in-home monitoring. Now with battery operation there is no need to interrupt monitoring if you have to move the patient.

INTEGRATED PRINTER

The integrated printer in the VersaLab systems provides an immediate, real time printout of the non-stress test so there is no waiting for results. Unlike other “portable” systems that require connection to a separate printer, there is no reason to delay interpretation with VersaLab’s built-in documentation.

VERY AFFORDABLE

The VersaLab antepartum monitors are designed for use in an obstetrician’s office, antepartum clinic or in-home monitoring. We kept your needs in mind and made the systems easy to use and affordable.

VERSATILE AND ACCURATE

DOCUMENTATION FOR REIMBURSEMENT

The VersaLab systems provide on-the-spot documentation of the non-stress test. Both systems print the date, start time, end time and time elapsed for the exam. The printout also includes simple notation areas for the patient name, patient number, examiner name and notes. If alarm limits have been turned on, the High and Low Alarm settings will appear on the printout as well as indicate when an alarm has been triggered. Both the mother and the clinician can utilize individual event markers, which appear separately on the printout. This comprehensive documentation is clear, easy to interpret, aids in reimbursement, allows for placement in the patient’s chart and makes follow-up tests easier to compare.

NUMERIC OR GRAPHIC DISPLAY

You can choose whether the display screen on the VersaLab APM shows the Fetal Heart Rate (FHR) and Toco readouts as large numbers or as a graph trended over time. The printout will always show the test data in a simple to review graphic format.

The VersaLab APM2 display screen automatically switches from a single display when one Doppler probe is in use to a dual display mode when two probes are used for simultaneous monitoring of twins. All of the information is color-coded, making it simple for the clinician to see and interpret the data. When two Dopplers are in use, the data is shown in different colors in separate display boxes for each fetal heart rate. The Toco data is shown in its own display box. When viewing the printout, the two heart rates are easy to distinguish with one shown in black and the other in gray.

VALUE-PACKED

VersaLab APM and APM2 for non-stress testing are value-packed and offer the following great features.

- Easy to set-up and simple to operate
- Lightweight, battery or line operated for optimal portability
- Built-in printer for reimbursement documentation
- Sensitive Doppler probes and uterine activity indicator for the most accurate results possible
- Configurable alarms for more personalized testing
- Separate patient and clinician event markers for easier interpretation
- Large display for easy viewing
- Increased versatility with adjustable tilt-stand for wall mounting or desktop use
- Designed for durability and long life

APPLICABLE CPT CODES FOR FETAL MONITORING

The information about Medicare's relative value payment below represents a national average reimbursement amount associated with the codes. This fee schedule applies to Medicare payments only and may not reflect the true cost of the services provided. **Private sector fees will vary.**

MEDICARE PAYMENT***			
Code	Description	Non Facility*	Facility**
59050	Fetal monitoring during labor by consulting physician (ie, non-attending physician) with written report; supervision and interpretation	\$52.60	\$52.60
59051	Fetal monitoring during labor by consulting physician (ie, non-attending physician) with written report; interpretation only	\$43.77	\$43.77
99500	Home visit for prenatal monitoring and assessment to include fetal heart rate, non-stress test, uterine monitoring, and gestational diabetes monitoring	\$0.00	\$0.00
99356	Prolonged physician service in the inpatient setting, requiring direct (face-to-face) patient contact beyond the usual service (eg, maternal fetal monitoring for high risk delivery or other physiological monitoring, prolonged care of an acutely ill inpatient); first hour (List separately in addition to code for inpatient Evaluation and Management service)	\$87.55	\$87.55
99357	Prolonged physician service in the inpatient setting, requiring direct (face-to-face) patient contact beyond the usual service (eg, maternal fetal monitoring for high risk delivery or other physiological monitoring, prolonged care of an acutely ill inpatient); each additional 30 minutes (List separately in addition to code for prolonged physician service)	\$88.29	\$88.29
59025	Fetal non-stress test	\$43.28	\$43.28

*Non Facility: Includes all other settings.

**Facility: Includes hospitals (inpatient, outpatient, and emergency department), ambulatory surgical centers (ASCs), and skilled nursing facilities (SNFs).
